

# JASON DEMETRI

## WEB DEVELOPMENT

I have spent 22+ years strengthening my programming and graphic design skills. Running a web design/development business has given me the opportunity to put both my programming skills and design work to use to help others see their vision materialize. The position requires that I work efficiently on my own but also be a team player for my clients. Although my natural tendency is to lead, I believe I am a good listener and take direction well.

Besides customer relations, time management skills are also needed on a daily basis. I have been blessed with the ability to think outside of the box and vision to see what is not there. This skill helps me to find solutions to problems where others may overlook. I keep focused on the results and diligently see a project through to the end. I believe I have a strong work ethic.
