JasonDemetri
Website Design and Development

design

...Seeking collaboration with passionate people who like to think outside of the box...

{Background}

I have spent the last 10 years strengthening my programming skills and the last 17 years, my graphic designing. Running a web design/development business has given me the opportunity to put both my design work and programming skills to use to help others see their vision materialize. The position requires that I work efficiently on my own but also be a team player for my clients. Although my natural tendency is to lead, I believe I am a good listener and take direction well. Besides customer relations, time management skills are also needed on a daily basis.

I have been blessed with the ability to think outside of the box and vision to see what is not there. This skill helps me to find solutions to problems where others may overlook. I keep focused on the end result and see a project through to the end diligently. I believe I have a strong work ethic.

{Selected Experience}

July, 2010 - present   **PGi**
